

## SEAT BELT POLICY

**EIDO GROUP** recognizes the importance of the seatbelt as a lifesaving device.

As a result of this recognition, seatbelts are fitted in every sitting position in all the company's vehicles and mobile heavy-duty equipment.

It is therefore mandatory that every driver/operator, front and rear seat passenger, use the available seatbelt before take-off of the vehicle.

Any movement that does not require the use of a seat belt must be made on foot.

Breach of the seat belt rule must not be accepted.

Safety and transport departments are empowered to monitor and report noncompliance to management without delay.
